Summary of Investment Returns

Quarterly Synopsis

- The coronavirus pandemic caused a global economic downturn. World equity markets declined precipitously in Q1.
- U.S. equity was sharply negative. Economic activity was severely limited as much of the country's business activity shut down.
- International equities also sank. The economies of the Eurozone and Japan were hit hard as the pandemic spread.
- Emerging market equity fell further than US and DM equity. Weakened demand for commodities and a strong USD stung in Q1.
- U.S. fixed income was one of few bright spots. Yields fell across the U.S. Treasury curve as investors gravitated toward safety and the Federal Reserve cut short term rates.
- Non-U.S. fixed income declined. A relatively strong USD hurt unhedged non-US debt.
- Hedge funds fell, but declines were lower than for equities. Macro strategies held up best, posting a small gain.

Q1 2020 In Review: U.S. Economy

GDP Growth

- U.S. GDP growth fell by -4.8% in Q1 2020. It was the first quarterly decline since Q1 2014 and the steepest fall since the fourth quarter of 2008.
- Consumer spending led the drop. Business investment also declined, and the falloff in business and investment spending was only partly made up by government spending and residential investment.
- The pace of exports fell -8.7% in the first quarter, while imports dropped -15.3% as Americans pared back purchases of foreign goods.

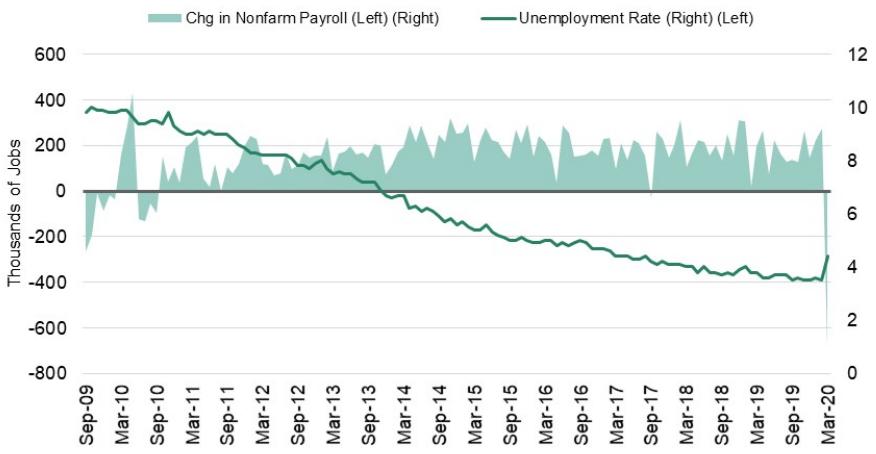

U.S. Real GDP Growth

Employment Picture

- The unemployment rate was 4.4% in March, sharply higher than its level in Q4. Nonfarm payrolls fell by 212,000 over the quarter as March payrolls tumbled by 701,000.
- The services sector led job losses in March with -659,000. Within services, leisure and hospitality (-459,000) saw some of the steepest declines.
- Health care and social assistance employment was also lower (-61,000). Job losses in that sector were concentrated among dentists (-17,000) and physicians' offices (-12,000).

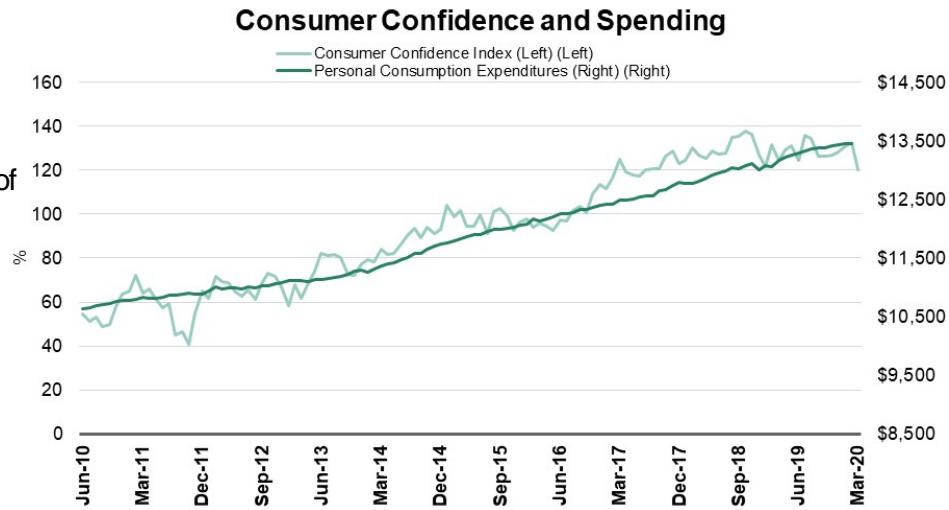

U.S. Nonfarm Payrolls and Unemployment Rate

Q1 2020 In Review: U.S. Economy

Consumer Confidence and Spending

- Sentiment declined sharply in Q1 as the COVID-19 outbreak spread. The Conference Board's Consumer Confidence Index decreased from 128 at the end of December to 120 at the end of March.
- Personal consumption expenditures rose in February*.
- The global pandemic dented consumer confidence, which had been robust in recent quarters. A sudden spike in joblessness from a quickly slowed economy took a toll on sentiment, particularly in March.

Retail Sales

- Retail sales ended March* down -3.5% from one year ago. Surging unemployment and declining consumer sentiment amid the pandemic stung sales.
- Sales were lower for clothing, furniture, restaurants and bars, motor vehicles, hobbies and electronics.
- However, sales were higher for health care and personal products.

Global Equity Performance and Valuations

- Global industrial production was slashed by the Covid-19 outbreak, which weighed on equities in Q1. All global markets fell significantly, with the US outperforming international developed and emerging markets by 3% and 4%, respectively.
- Most major central banks acted quickly to limit a further drop in global equities. The more substantial stimulus measures taken by the Federal Reserve and US Congress, as well as the continued strength of the US dollar, largely explained the US' relative outperformance.
- The oil price war between Russia and Saudi Arabia hurt global energy companies, as the MSCI ACWI Energy index fell 44% in Q1, compared to the MSCI ACWI index's 21% decline.
- The downturn in global markets caused most valuations to fall to near their 20 year medians. The US Mid Cap and MSCI Japan indices both offered greater than 15% discounts to long term valuations at quarter-end.

Data range is from 3/31/00-3/31/20. P/E ratios are forward 12 months.

- The HFRI Fund Weighted Composite lost -9.39% in Q1. Global Macro – up 0.07% -- was the leading strategy, while Emerging Markets and Event Driven experienced significant losses, -13.87% and -15.28%, respectively.
- Event-Driven strategies were stung most by Activist, Credit Arbitrage, and Merger Arbitrage, among other sub-strategies, as investment theses were challenged – if not completely distorted – by increased uncertainty due to COVID-19 and liquidity pressure across markets. Emerging Markets were impacted by global growth concerns from the virus' spread across developed markets.
- The Fund of Funds Composite lost -7.30% in Q1. The peer group outperformed the 60% MSCI ACWI / 40% Bloomberg Barclays Global Aggregate blended index, which lost -13.23%.

Q1 2020 In Review: Private Equity

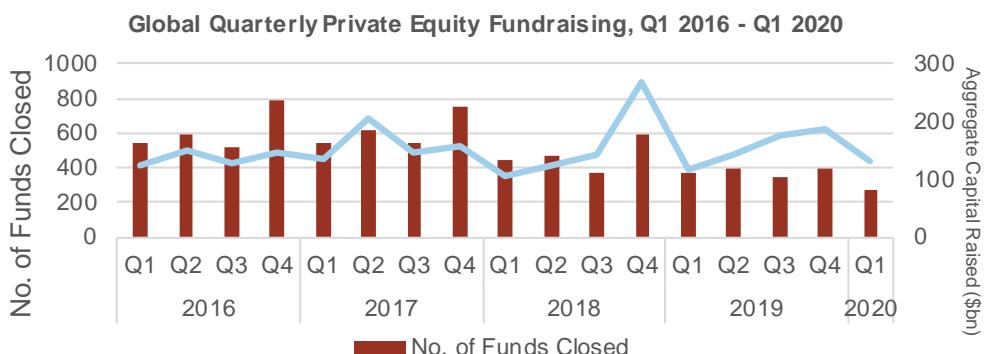

Performance

- The total return for US private equity funds, comprising performance across all strategies, was 5.54% in Q4 2019* and 20.3% over the 1-year period ending Q4.
- The 5-, 10-, and 20-year returns for US private equity funds were 14.7%, 16.1% and 9.6%, respectively, at the end of Q4 2019.
- The continuation of the bull market through 2019 allowed Private Equity managers to realize strong returns to end the decade.

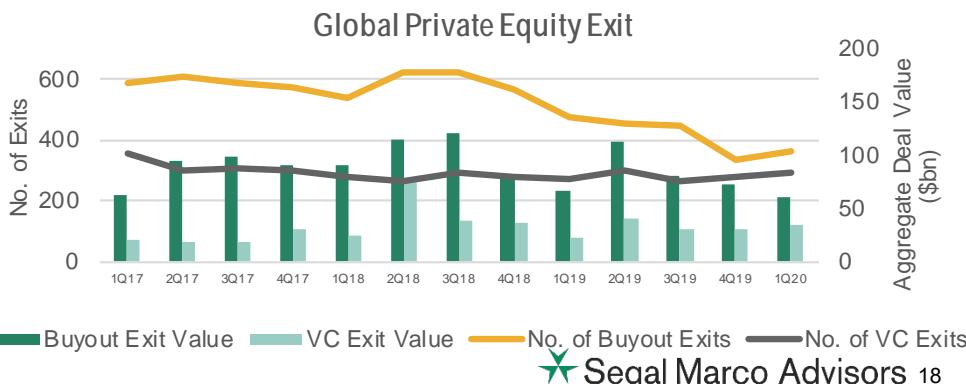

Fundraising

- Globally, private equity funds raised approximately \$133 billion across 267 funds in the first quarter of 2020. This was the lowest number of fund closings in a quarter in the past 5 years.
- As of 3/31/2020, there were currently 3,620 private equity funds raising capital targeting an aggregate \$933 billion.

Exit Activity

- The number of deals and exits was relatively in line with Q4 2019 even as the Covid-19 pandemic halted business travel for much of the last month of Q1 2020.
- While IPOs were down for venture backed exits, deal flow was still strong with trade sales and sales to private equity sponsors.

Q1 2020 In Review: Real Estate

Real Estate Performance

- NFI ODCE was up 97 bps for the quarter, while the NCREIF NPI gained 71 bps and the NAREIT Equity REIT Index fell -23.44%.
- Income for the NFI-ODCE was 102 bps for the quarter, which accounted for all of the ODCE return. Assets declined by negative 5 bps for the first quarter due to impact of Covid-19.
- In the U.S., the retail sector declined -3.2% for the first quarter of 2020 and hotel sector fell -4.75%. More write-downs are expected in the second quarter of 2020 as retail and hotel sectors experience tenant defaults and historically low occupancy.
- Enormous discrepancies in valuations between public and private markets highlighted potential undervaluation of public real estate securities in the short term, as well as what's to come for private market. The private real estate market was mostly frozen with few transactions in March of 2020. Sellers and buyers were hesitant to enter into transactions given market uncertainty.
- Specifically to Covid-19, sectors such as multi-family and industrials are viewed as defensive as people stay home, which benefited from continued growth of e-commerce.

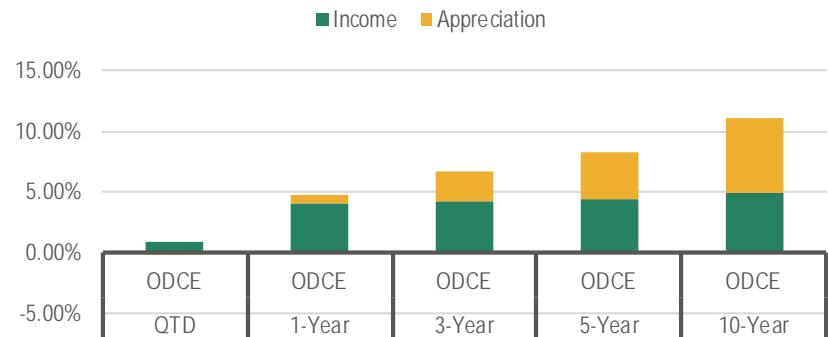

Real Estate Capitalization Rates* vs. Treasuries

- Equal weighted cap rates edged up slightly for the quarter from 4.39% to 4.41% partially due to a sharp decline of property values in retail and hotel sectors. Operating income remain relatively flat in the first quarter.
- The 10-year Treasury rate fell dramatically in the first quarter of 2020. As a result, the Q1 2020 spread between the 10-year Treasury rate and cap-rates (which have held more consistent levels) was 371 bps, a 1.24% increase from Q4 2019.

*A cap rate is the potential rate of return on a real estate investment. Assuming no change in net operating income, real estate valuations rise when cap rates fall. Comparing cap rates to the 10-year U.S. Treasury provides investors with an estimated spread for expected returns from real estate (higher risk) vs. fixed rate bond (lower risk) investments.

Q1 2020 In Review: Infrastructure

Infrastructure Performance

- Private infrastructure gained 2.2% in Q2 2019* and 10.5% over the 1-year period ending June 30, 2019.
- Strong investor demand for infrastructure investments has led to good absolute performance across all time periods.
- The number of deals completed in Q4 2019 rose slightly to 680 from 631. At \$465.4 million, the average deal size for 2019 is at a record high with a \$57 million increase relative to 2018. Average deal size has increased throughout 2019.
- Public infrastructure registered a -21.25% return in Q1 2020, as per the FTSE Global Infrastructure 50/50 Index. Global infrastructure securities were significantly impacted due to the Covid-19 pandemic specifically those related to energy and transportation.

Preqin Infrastructure Annualized Return as of 6/30/2019*

According to Preqin, the Preqin Infrastructure Index captures the average returns earned by investors in their infrastructure portfolios, based on the actual amount of money invested. The Preqin Infrastructure index is calculated on a quarterly basis using data from Preqin's Infrastructure Online services.

Dry Powder and Fundraising

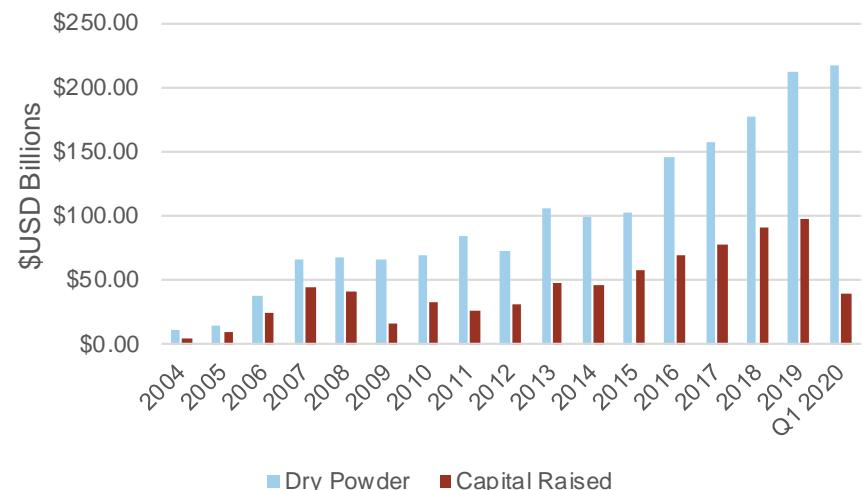

- Infrastructure fundraising continued its strong momentum in Q1 2020, with \$39 billion raised, relative to Q4 2019's fundraise of \$35 billion. However, deal-making had a slow start of the year due to Coronavirus impact.
- Dry powder** has increased to \$217.8 billion. The rise in fundraising led to more dry powder, but we are seeing a decrease in dry powder's speed of growth.
- North America-based managers have driven fundraising and the growth of dry powder in 2019. \$29 billion of the total funds raised focuses on North America, \$7 billion focused on Europe and \$3 billion on rest of the world. Asia, getting severely hit by coronavirus, raised \$0 in Q1 2020. This signals declining investor sentiment towards unlisted infrastructure going forward due to the pandemic.
