Global Equity Performance and Valuations

- U.S. equity markets were higher in Q3, while developed international and emerging markets were lower.
- After climbing through July, global equity markets dipped sharply in August, but then recovered into mid-September as new U.S.-China talks were announced and odds of a no-deal Brexit declined.
- Trade risks across the globe remained unresolved, which led to the underperformance of international stocks in Q3 relative to domestic markets. Global trade uncertainty particularly undermined countries that are tightly integrated with Chinese supply chains.
- Trade issues were not limited to China and the U.S.– questions surrounded trade relations between the U.S. and Europe and between Japan and South Korea.
- Brexit and other political questions also dogged international stocks. While odds of a no-deal Brexit declined, uncertainty surrounding the situation continued.

Japan (3.1%) and Netherlands (2.4%) both had positive absolute returns in the quarter, while Spain (-3.8%), Germany, and Sweden were among the worst performers.
- A strengthening US dollar hampered both developed and emerging markets, as the Trade Weighted USD Index rose 3% during the quarter.
- Protests in Hong Kong caused turmoil in Asia and dragged Pacific Asia ex Japan down, while Brexit uncertainty continued to act as a headwind to UK stocks despite a reduced chance of a no deal exit. The ECB's announcement of a new monetary stimulus package was a positive for Europe stocks.
- Energy fell the most in Q3 with the drop in crude prices. Materials (-5.42%) and financials (-2.59%) also struggled. Health care (+2.41%) and utilities (+2.39%) gained the most.

Performance

- Emerging markets slumped in Q3, falling nearly 4.3%, yet again trailing both domestic and international developed markets.
- The US China trade war continues to be a headwind to EM equities as the two countries announced a new round of tariffs. Emerging market stocks fell sharply in both July and August amid geopolitical volatility, including the bombing of several ARAMCO oil fields in Saudi Arabia, before posting a slight positive return in September.
- Taiwan was the only EM country to post positive returns for the quarter (5.2%) driven by Taiwan Semiconductor, which benefited from strong Q2 earnings and an acceleration in 5G deployments, while South Africa fell nearly 13% as a result of economic and geopolitical issues.
- All EM sectors posted negative absolute returns, with the exception of tech. EM tech, despite poor performance from China's tech conglomerates, showed resiliency in posting positive absolute performance. Materials and healthcare continue to be strong detractors.

- The yield curve inverted in late August, with the 10-year yield falling below the 2-year yield. Global demand for Treasuries also contributed to lower yields across all tenors.

The 2-year Treasury ended the quarter at 1.63%, which was 12 bps lower than the prior quarter. United States Treasury Yield Curve

Monetary Policies/Global Interest Rates

- Central bank deposit rates remained negative in Japan and Europe. The European Central Bank lowered the deposit rate by 10 bps to negative 0.50%.
- Concern for economic growth increased due to the inverted yield curve, which is considered to be a leading indicator of recession
- The U.S. continues to be a global outlier with its policy rate at 2.0%. Policy rates in the Eurozone and Japan remain negative. The ECB cut its deposit rate and said it will restart bond purchases in November in an effort to stimulate economic growth in Europe.

- With the exception of bank loans, most domestic fixed income spreads were either tighter than or in line with end of Q2 levels, but still wider than the levels seen at the end of the third quarter of 2018.

Performance

- The total return for private equity funds, comprising performance across all regions and strategies, was 4.3% in Q2 2019* and 12.3% over the 1-year period ending Q2.
- The 5-, 10-, and 20-year returns for private equity funds were 12.0%, 14.8% and 12.1%, respectively, at the end of Q2. Venture funds continued to outperform other strategies over the most recent five years, however, over the long-term, the return dispersion across asset classes narrowed.
- 2015-through-2017-vintages all generated impressive returns by Q2, with venture even generating 20+% IRRs.

Fundraising

- Globally, private equity funds raised approximately \$417.3 billion through September 2019, which was \$72.5 billion higher than that was raised in the same period of 2018.
- Capital continues to be concentrated among a small number of large funds. Also, the number of funds closed has declined significantly: 895 funds have closed year-to-date compared to 1,150 during the same period a year ago.
- Dry powder** continues to rise and so does unrealized value, which stood at a record \$1.3 trillion as of 2018 YE.

Exit Activity

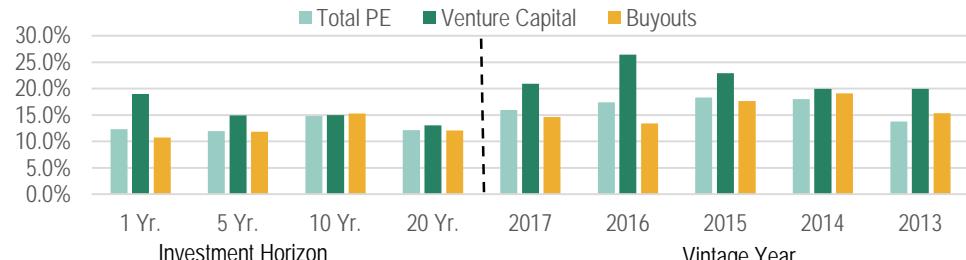

- Buyout exits have also seen an appreciable drop in value and volume this year. Activity continued to slow down in Q3 2019 with only 408 exits made in the quarter.
- Venture-backed exits slowed down in Q3, recording the lowest number of exits (247) over the 5-year period. Total value of exits also decreased to \$26 billion, reflecting the exit challenge for venture capital managers. WeWork's delayed IPO cast uncertainty over valuations of other tech firms that were also planning to go public.

Q3 2019 In Review: Real Estate

Real Estate Performance

- NFI ODCE was up 131 bps for the quarter, while the NCREIF NPI gained 141 bps and the NAREIT Equity REIT Index gained 773 bps
- Income for the NFI-ODCE was 105 bps for the quarter, and has been consistently between 4.1% - 5% over a trailing 1-3-5-10 year basis
- US property fundamentals continue to show modest operating results but are seeing decelerating cash flow growth driven by slower economic growth and supply in line with current demand.
- US REITs finished the quarter trading at near 15% premium to NAV. That is relative to a 7% average historical premium.
- Certain sub-sectors (primary CBD office, shopping centers, hotels, malls) are trading at significant discounts relative to private real estate valuations, presenting a potentially attractive asymmetric risk/return profile should the gap close.

NCREIF Fund Index (NFI) Open-End Diversified Core (ODCE) Real Estate Performance

The NFI-ODCE (Open-end Diversified Core Equity) is defined by NCREIF as a fund-level cap-weighted, gross of fee, time-weighted return index with an inception date of December 31, 1977.

The NFI-CEVA Index, which is a quarter lagged in performance reporting, is defined by NCREIF as a capitalization-weighted, gross of fees, time-weighted return index. Funds included in the index must be closed-end with a value-add strategy operated for U.S. institutional investors and must comply with NCREIF's data collection and reporting standards.

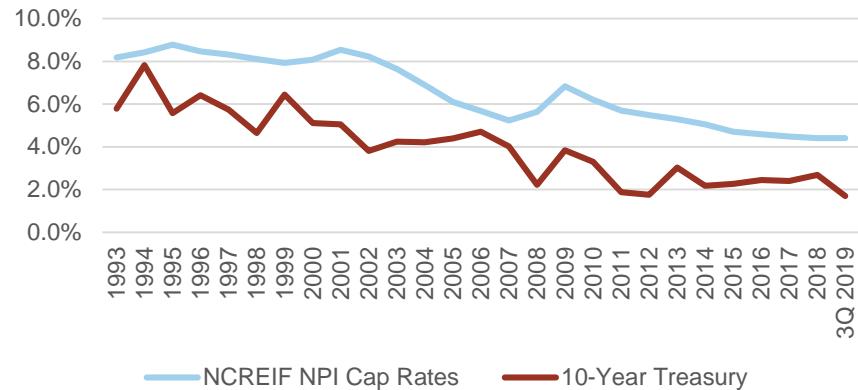

Real Estate Capitalization Rates* vs. Treasuries

- Asset values remain steady for the most part; however, record levels of capital committed with growing number of retail assets for sale with limited price discovery YTD.
- Concerns among some market participants that values may have peaked after significant appreciation, but declining bond yields YTD plus continued easy credit financing have reduced those concerns
- Prevailing cap rates have been buoyed by historically wide spreads versus financing costs and persistent demand for real estate.
- Treasury rate decreases in 2019 relative to more consistent cap rates have resulted in a 272 bps spread as of 3Q 2019, the widest spread since 2014

*A cap rate is the potential rate of return on a real estate investment. Assuming no change in net operating income, real estate valuations rise when cap rates fall. Comparing cap rates to the 10-year U.S. Treasury provides investors with an estimated spread for expected returns from real estate (higher risk) vs. fixed rate bond (lower risk) investments.

Q3 2019 In Review: Infrastructure

Infrastructure Performance

- Private infrastructure gained 2.6% in Q4 2018* and 9.6% over the 1-year period ending December 31, 2018.
- Strong investor demand for infrastructure investments has led to good absolute performance across all time periods. The 4th quarter returns are indicative of continued solid income and appreciation for infrastructure assets.
- The number of deals completed in Q3 2019 fell slightly to 607 from 623 and is still well below the quarterly average number of deals. At \$460.6 million, the average deal size year to date is on pace to be a record high. Average deal size has increased throughout 2019.
- Public infrastructure registered a 2.1% return in Q3 2019, as per the FTSE Global Infrastructure 50/50 Index. Investors have favored infrastructure securities in the volatile market due to their contracted cash flows and relative safety.

Preqin Infrastructure Annualized Return as of 12/31/2018*

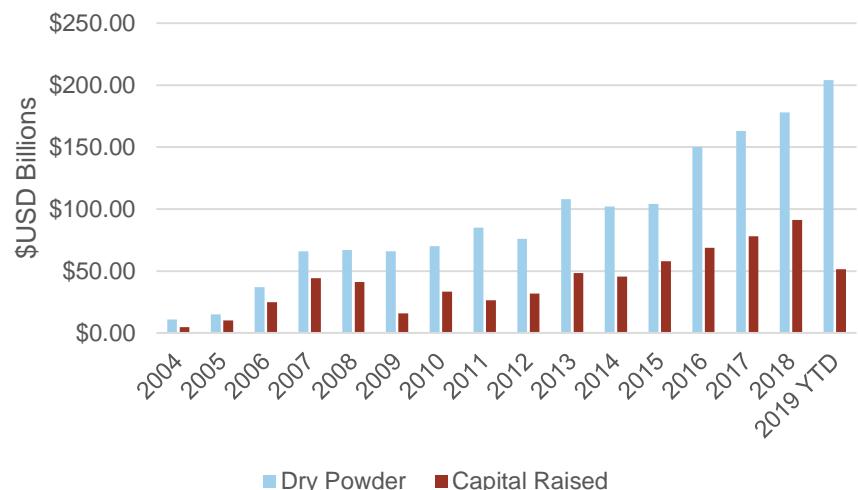

According to Preqin, the Preqin Infrastructure Index captures the average returns earned by investors in their infrastructure portfolios, based on the actual amount of money invested. The Preqin Infrastructure index is calculated on a quarterly basis using data from Preqin's Infrastructure Online services.

Dry Powder and Fundraising

- Infrastructure fundraising remains strong but there was a significant dip in Q3 of 2019. \$9.3 billion in funds were raised in Q3 2019 with an average fund size of \$488 billion. This is down from the \$23.1 Billion raised in Q2 2019 at the average fund size at \$887 million.
- Dry powder** dropped to \$204 billion. The decline in fundraising and a greater ability for managers to put capital to work helped decrease the amount of dry powder available.
- North America-based managers have driven the growth of dry powder in 2019. Asian and European based strategies have not seen significant growth in dry powder this year.

Commodity and Currency Highlights

- The Bloomberg Commodity Index decreased during Q3, with 18 out of 23 constituents posting negative performance.
- Underlying performance across sectors was mixed as Energy and Agriculture both posted negative returns. The top three detractors across all constituents during the quarter were in Agriculture due to favorable weather conditions that increased expected yields for the year, lowering prices.
- All base metals declined due to a stronger US Dollar and the continuing US-China trade war, except Nickel, which drove the sector's positive performance with an ~35% increase as a result of the Indonesian government announcing a ban on all nickel ore exports starting in 2020.
- Energy declined after a volatile quarter, which included a coordinated attack on a major Saudi Arabia oil field, temporarily reducing global crude oil production and processing by ~5%.
- The USD strengthened in Q3, while the yen was relatively flat and the euro was lower.
