Quarter In Review: U.S. Economy

GDP Growth

- U.S. GDP growth rose 1.1% in the quarter ending March 31.
- While quarterly growth was still positive it shows a slowdown from previous quarters. As inflation has stayed elevated, the Federal Reserve's interest rate hikes are likely working to slow the economy.
- The economy still has stayed out of recession territory, with consumer spending and exports both positive but slowed late in the quarter.
- However, numerous challenges remain, including still high inflation, continued fallout from the global banking situation, and geopolitical uncertainty.
- Private inventory investment and nonresidential fixed investment both declined in the quarter.

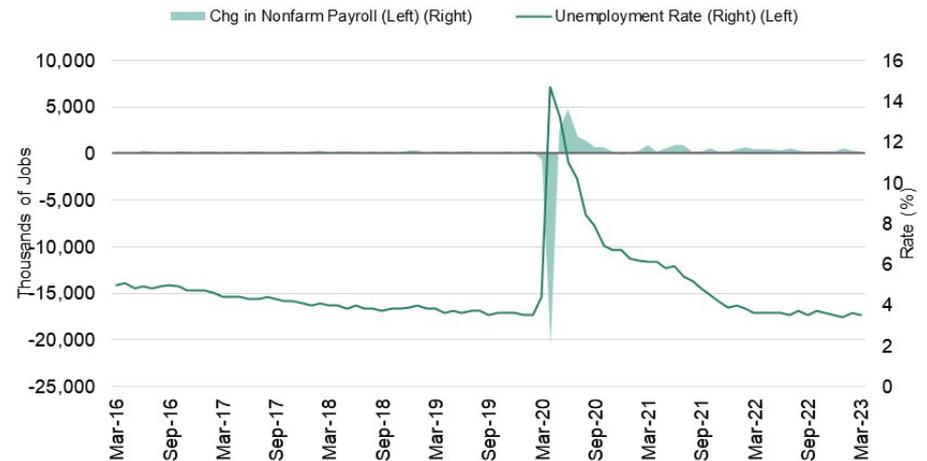

U.S. Real GDP Growth

Employment Picture

- The unemployment rate was 3.5% in December, beating market expectations once again.
- Nonfarm payrolls rose by 236,000 in March, which was slightly below expectations. While it may be a sign of a somewhat cooler economy, the job market remains relatively strong, making the Federal Reserve's rate hike decisions more challenging going forward.
- The services sector continues to lead and both the leisure and hospitality sector gained the most in March (72k), while government added 47k jobs.

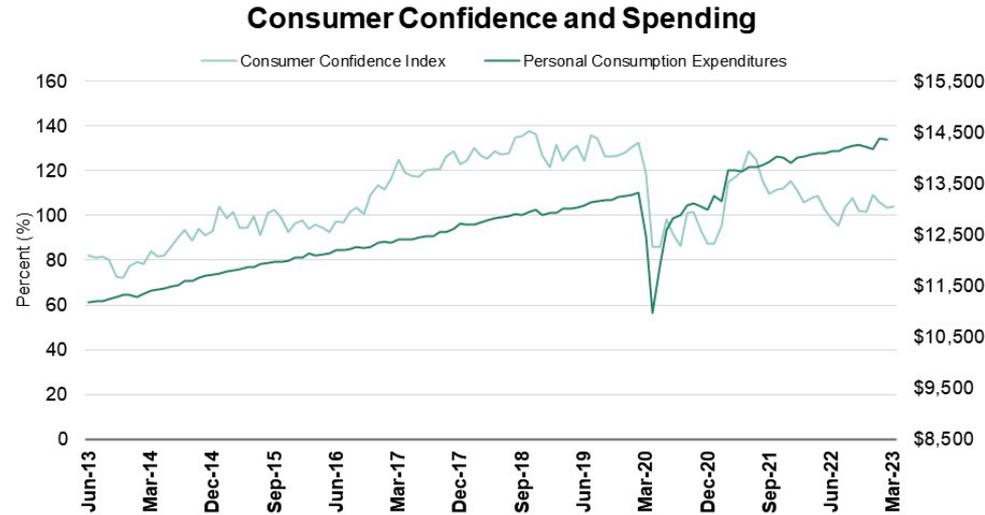

U.S. Nonfarm Payrolls and Unemployment Rate

Quarter In Review: U.S. Economy

Consumer Confidence and Spending

- The consumer confidence index declined slightly in the quarter. While consumers were still spending, it slowed in the quarter amid the backdrop of interest rate hikes and growing recession fears.
- Inflation continues to weigh on consumer sentiment, with assessments of personal finances worsening due to higher expenses.
- Personal consumption expenditures rose slightly in the quarter.

Retail Sales

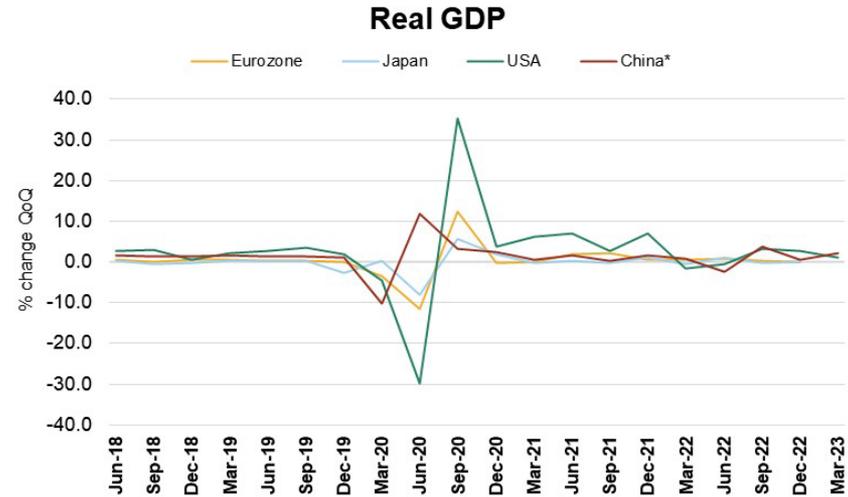

- Retail sales fell -1% in March 2023, more than analyst expectations and signaling that higher interest rates and inflation are affecting the consumer.
- Sales at gas stations (-5.5%) had the biggest decrease in March, followed by general merchandise stores (-3%).
- Motor vehicle sales fell -1.2% in March.
- Declines in retail sales in February and March came after they rose in January. While consumer spending was positive in the quarter, much of that spending came in January.

Quarter In Review: Global Economy

World GDP Growth

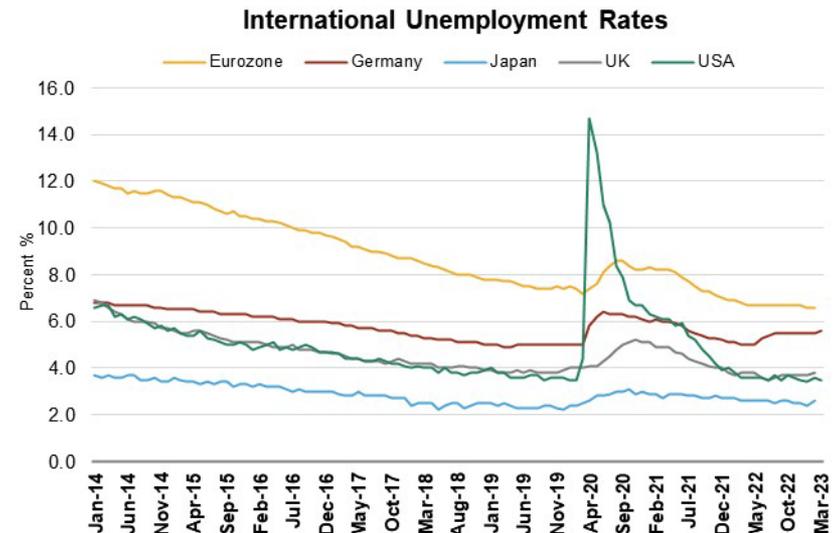

- Eurozone GDP inched up +0.1% quarter over quarter (QoQ). It just missed expectations of 0.2% growth. High inflation and the fastest pace of rate increases in 20 years by the European Central Bank hit economic performance in the quarter.
- China's GDP growth was up +2.2% in the quarter ended March 31. Growth picked up after the country's government lifted COVID related restrictions last December.
- Japan's GDP was flat in the quarter ending December 31**. Private consumption grew less than anticipated.
- U.S. GDP grew +1.1% in the quarter ending March 31.

Note that the figures in the graph above represent the percent change in real GDP from the previous quarter, not the annual growth rate of these economies.

Global Employment Picture

- Eurozone unemployment was +6.6% in February 2023**, a number that has been relatively stable over the past few months.
- Germany (+2.9%) had the lowest unemployment rate in the Eurozone, while Spain (+12.8%) and Italy (+8.0%) had two of the highest.
- Japan's unemployment rate rose to +2.8% in March, an unexpected increase.

Performance

All data in the tables are percentages.

- U.S. equities were up +7.5% for the quarter ending March 31. Despite market volatility following the collapse of Silicon Valley Bank (SVB), market sentiment remained optimistic. The Fed continued to raise rates twice (by 25 bps in both February and March), as key economic data showed some weakening in inflation, but robust jobs data.
- Growth significantly outperformed value during the quarter, as Financials and Energy lagged compared to other sectors. Anticipation of slower rate hikes and improving inflation contributed to reigniting interest in growth companies despite their sensitivity to higher rates.
- Large cap stocks substantially outperformed small cap. Similar to large cap, small cap growth beat small cap value; small cap value was the only index to produce negative returns (-0.7%) for the quarter as the exposure to regional banks was a major detractor to results.
- Information Technology (+21.8%) and Telecom (+20.5%) have dominated the U.S. sectors as large constituents including Meta, Apple, and Alphabet continue to produce outsized returns. The fall of SVB created turbulence in the Financial sector (-5.6%), while Energy (-4.7%) pulled back from its significant outperformance in 2022.

Performance

- Developed international stocks were resilient, posting gains of +8.5% for the quarter. The markets finished strong despite continued interest rate hikes and heightened volatility in the banking sectors.
- Europe was up +10.6% for the quarter behind stronger than expected economic data, an easing energy crisis, and a rebound in the financial sector following the UBS-Credit Suisse transaction.
- Japanese stocks were up +6.2%, as cyclicals were supported by weaker yen growth (+2.0% against the U.S. dollar) compared to the previous quarter (+9.0%). Japanese financials also rebounded well following the U.S. and European bank shock, and domestic companies generated higher than forecasted sales.
- All international sectors with the exception of Real Estate (-2.1%) generated positive returns for the quarter as the sector suffered from decreased occupancy rates and increased financing costs. More economically sensitive sectors such as Consumer Discretionary (+17.0%) and Technology (+19.0%) outperformed in line with growing optimism that central banks will pivot to cutting interest rates in late 2023.

Performance

- Emerging markets were up +4.0% during the quarter, as the re-escalation of US-China tensions and volatility in U.S. and European banks detracted from the momentum of China's re-opening.
- China (+4.7%) had a positive quarter despite geopolitical tensions with the U.S. as the re-opening and ease of regulatory restriction on the technology sector lifted the equity market.
- India (-6.3%) lagged the index following investor concern over economic growth as well as accusations of stock manipulation and accounting fraud against Adani Group (one of India's largest conglomerates) early in the quarter. Brazil (-3.2%) fell in U.S. dollar terms in the midst of anti-government protests early in the year and softening economic data.
- Emerging market sectors had mixed results for the quarter. Growth sectors such as Technology (+14.7%) and Telecom (+12.6%) were the strongest sectors, while Utilities (-10.5%), Healthcare (-4.9%), and Real Estate (-1.6%) lagged amid central banks interest rate increases.

Capitalization Rates & 10-Year U.S. Treasury Rates

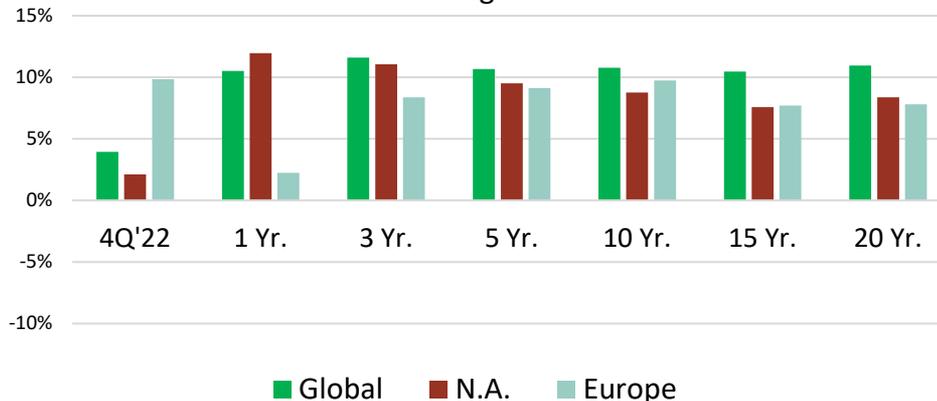

*A cap rate is the potential rate of return on a real estate investment. Assuming no change in net operating income, real estate valuations rise when cap rates fall. Comparing cap rates to the 10-year U.S. Treasury provides investors with an estimated spread for expected returns from real estate (higher risk) vs. fixed rate bond (lower risk) investments. NFI-ODCE returns are preliminary performance. Sources this page: NCREIF, NPI, FRED Economic Data (Federal Reserve Bank of St Louis) 1.
