## Summary of Investment Returns

## Quarterly Synopsis

- World equity markets were sharply negative, with worries over inflation, slowing growth, and the Ukraine conflict weighing on stocks.
- U.S. equities declined. Two Federal Reserve rate hikes, persistent inflation, and worries over Ukraine helped lead stocks lower.
- International equities also fell, as inflation rose and energy supply concerns grew with the Russia/Ukraine conflict.
- Emerging market equity declined with US dollar strength and continuing inflation concerns.
- U.S. fixed income was negative. Two interest rate hikes and the Fed's indications for further rate hikes hurt Treasuries.
- Non-U.S. fixed income fell. The European Central Bank hiked rates for the first time in 11 years and said it would end asset purchases in the second half of 2022.
- Hedge funds posted a more minor decline. Macro strategies performed best in the quarter.
- Commodities declined as well, with industrial and precious metals both tumbling.

# Quarter In Review: U.S. Economy

## GDP Growth

- U.S. GDP growth fell -0.9% in the quarter ending June 30, the second quarter in a row of negative growth.
- Typically two consecutive quarters of negative growth means the economy is in a recession, but the Fed has said that the ongoing strength of the labor market means that it is still too soon to call it one.
- Consumer spending declined as higher inflation persisted, and business investment fell slightly.
- The economy is facing growing challenges, including rising interest rates, persistent inflation, and supply disruptions stemming from the pandemic and the Russia/Ukraine conflict.

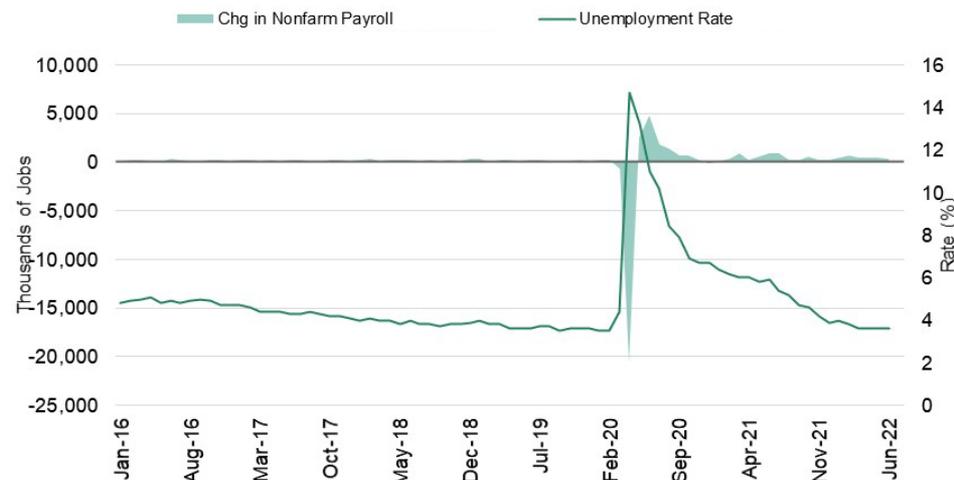

### U.S. Real GDP Growth

## Employment Picture

- The unemployment rate was 3.6% in June, holding steady at that level for the fourth month in a row.
- Nonfarm payrolls rose by 372,000 in June, a strong number that muddies the recession narrative and complicates the Fed's interest rate decision making at a time when growth is slowing.
- The education and health services sector gained the most in June (96k), while professional and business services added 74k.

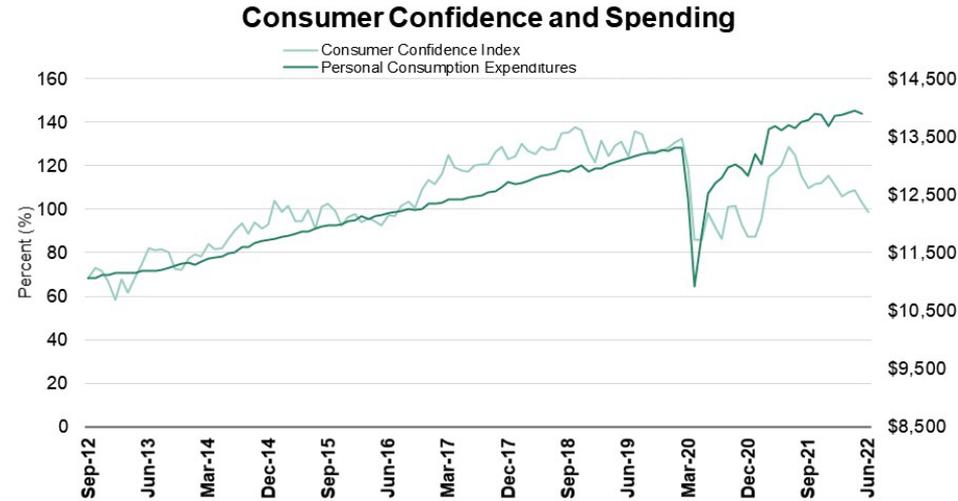

### U.S. Nonfarm Payrolls and Unemployment Rate

# Quarter In Review: U.S. Economy

## Consumer Confidence and Spending

- The consumer confidence index slid in the quarter as Americans continued to become more pessimistic about the state of the economy.
- Inflation, the Russia/Ukraine conflict, and negative stock and bond markets weighed on consumer sentiment.
- Confidence also waned among business leaders, who said the cost of goods and labor meant that they were paying far more to keep their companies running.
- Personal consumption expenditures fell in May\*.

## Retail Sales

- Retail sales rose +1% in June 2022 and +8.4% year over year.
- Sales data are not adjusted for inflation, so much of the higher retail sales figures are a reflection of price increases. For instance, spending at gas stations rose 3.6% in June, which was largely a result of higher gas prices.
- When adjusted for inflation, sales were slightly lower.

# Quarter In Review: Global Economy

## World GDP Growth

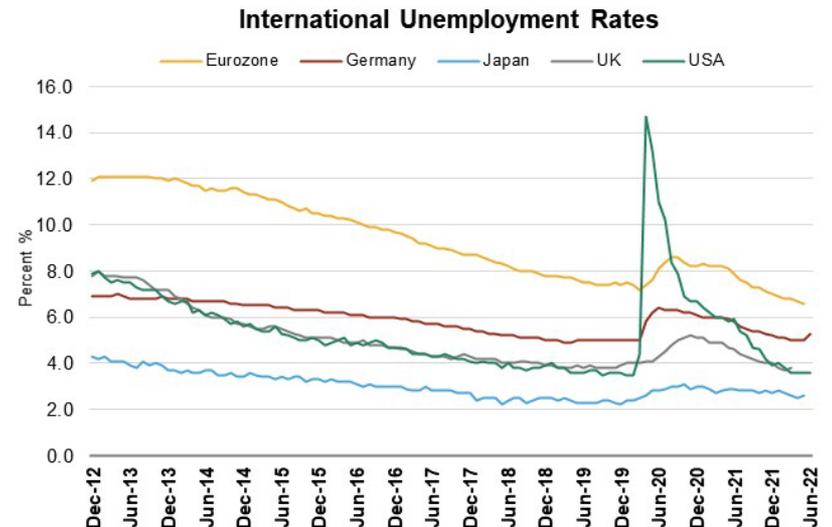

- Eurozone GDP rose +0.7% quarter over quarter (QoQ). The economy grew despite growing consumer pessimism with high inflation, rising interest rates and the ongoing Russia/Ukraine conflict.
- China's GDP grew at a rate of +0.4% in the quarter ending June 30. Growth missed expectations as the economy was slow to emerge after COVID-related lockdowns.
- Japan's GDP fell -0.1% in the quarter ending March 31\*\*. Business investment turned negative in the quarter and public investment fell more than anticipated.
- U.S. GDP declined -0.9% in the quarter ending June 30.

Note that the figures in the graph above represent the percent change in real GDP from the previous quarter, not the annual growth rate of these economies.

## Global Employment Picture

- Eurozone unemployment was +6.6% in May 2022\*\*, beating market forecasts. The unemployment rate has been declining since early 2021 as more of Europe has reopened after the height of the pandemic.
- Germany (+2.8%) and the Netherlands (+3.3%) were two major European economies with some of the lowest unemployment rates in the Eurozone.
- Japan's unemployment rate ticked up to +2.6% in May.\*\*

## Performance

- US equities were down -16.1% for the quarter ending June 30. Inflation dominated headlines as CPI increased 8.6% year over year in May and 9.1% in June, the largest one-year increase since 1981, prompting the Fed to hike rates by 0.75% in June.
- Growth underperformed value across the market cap spectrum as increases in the cost of capital and discount rates weighed on earnings expectations.
- Small cap stocks slightly underperformed large cap as economic growth slowed, with the purchasing managers' index falling -5.6% in June, reaching a five-month low.
- All sectors were negative in the quarter, consumer staples (-4.6%) was the strongest on a relative basis. Consumer Discretionary (-26.2%) and telecom (-20.7%) were down the most. With the strength in energy during the year, the one-year return of +40% far outweighed the return of other sectors.

## Performance

- Developed international stocks fell -14.5% during the quarter ending June 30 as the war in Ukraine continued to weigh on markets and recession fears weighted on stock valuations.
- Europe struggled in the quarter, falling -10.0% during the month of June following the European Central Bank's announcement it would end its asset purchases and raise the deposit rate along with the Bank of England's further interest rate hikes.
- Japanese stocks fell -14.6% and the yen weakened relative to the US dollar. The USD-yen exchange rate crossed 130 for the first time in 20 years. The Bank of Japan maintained its loose monetary stance despite inflation beginning to hit the Japanese economy.
- All sectors were negative in the quarter, with the energy sector falling the least (-4.1%). Energy is the only positive sector over the trailing one-year period. Semiconductor and technology hardware stocks dragged down the information technology sector amid continued global supply chain issues, while materials stocks struggled in the face of falling commodity prices.

## Performance

- Emerging markets fell -11.5% during the quarter as strength in the US dollar and falling commodity prices later in the quarter provided headwinds. Emerging markets outperformed both developed international and US markets, largely due to China's positive performance.
- China (+3.4%) was the only emerging market notching a positive return during the quarter ending June 30 as Covid-19 lockdown measures were relaxed and the economy began to reopen.
- Commodity-linked markets in Latin America fell significantly during the second quarter as the Latin America index fell -22%, driven by a drop in industrial metals and agriculture prices.
- Consumer discretionary (+6.3%) was the only positive sector in the quarter as stock prices in large Chinese companies such as Alibaba and Meituan recovered following easing of lock down and Covid restrictions. The falling price of metals hurt materials (-20.6%) while continued inflation and global supply chain issues hampered technology stock performance (-20.8%).
